

Byeonggil Jun

Computer Engineering Ph.D. Student
byeonggil@asu.edu
<https://byeonggiljun.github.io/>
Arizona State University

EDUCATION

Arizona State University

Ph.D. student in Computer Engineering

- School of Computing and Augmented Intelligence
- Advisor: Professor Hokeun Kim

Tempe, AZ, USA
Jan.2024 – Present

Hanyang University

B.S. in Electronic Engineering

- Department of Electronic Engineering
- Advisor: Professor Hokeun Kim
- Overall GPA: 4.26/4.5 (97.9/100)

Seoul, South Korea
Mar.2018 – Feb.2024

AREAS OF INTEREST

Embedded Systems, Cyber-Physical Systems, Computer Architecture, Real-time Systems,

PUBLICATIONS

Peter Donovan, Erling Jellum, Byeonggil Jun, Hokeun Kim, Edward A. Lee, Shaokai Lin, Marten Lohstroh, and Anirudh Rengarajan, "Strongly-Consistent Distributed Discrete-event Systems", ACM Transactions on Modeling and Computer Simulation (TOMACS), accepted for publication, 2025.

Byeonggil Jun, Megan Kuo, Aditya A. Krishnan, and Hokeun Kim, "Towards Efficient Privacy-Preserving Federated Learning on Edge with Reconfigurable FPGA", Forum on specification & Design Languages (FDL), Schloß Rheinfels, St. Goar, Germany, to appear, Sep 2025.

Byeonggil Jun, Edward A. Lee, Marten Lohstroh, and Hokeun Kim, "Efficient Coordination for Distributed Discrete-Event Systems", International Symposium on Formal Methods and Models for System Design (MEMOCODE), Raleigh, NC, Sep 2024.

Byeong-gil Jun, Dongha Kim, Marten Lohstroh, and Hokeun Kim, "Reliable Event Detection Using Time-Synchronized IoT Platforms," Time-Centric Reactive Software (TCRS), San Antonio, TX, May 2023.

HONORS AND AWARDS

ESWEEK 2024 Student Travel Grant, Sep 2024

CPS-IoT Week 2023 Travel Grant Award, May 2023

Academic Achievement Excellence Award, Hanyang University, 2022-2, 2022-1, 2021-1

RESEARCH EXPERIENCE

ASU KIM Lab

Research Assistant

- Lead a Lingua Franca project on enhancing performance of HLA-based distributed discrete-event systems
- Lead a project on developing optimal network-on-chip interconnection for heterogeneous chiplet-based systems running complex AI workloads
- Participate in a project on privacy-preserving federated learning systems using homomorphic encryption
- Participate in a project on soft-error tolerant real-time systems

Tempe, AZ, USA
Jan.2024 – Present

HYU IoT Lab

Undergraduate Research Intern

- Participated in Lingua Franca projects on improving reactor models using C and TypeScript
- Led project on detecting events reliably using simple distance sensors with the TypeScript targeted reactor model

Seoul, South Korea
Mar.2022 – Dec.2023

ACADEMIC SERVICES

Secondary Reviewer

- 31st Asia and South Pacific Design Automation Conference (ASP-DAC 2026)
- Design, Automation, and Test in Europe Conference and Exhibition (DATE 2024)
- ACM SIGBED International Conference on Embedded Software (EMSOFT 2023)
